

West Berkshire

Green

Exchange

**Are you interested in  
creating a healthier,  
brighter future?**

The Green Exchange is  
an excellent resource  
to assist the transition to  
a low-carbon way of life

for more information

We promote sustainable living by exploring and developing ways to reduce waste and greenhouse gas emissions, increase the uptake of renewable energy technologies and enhance the natural environment.

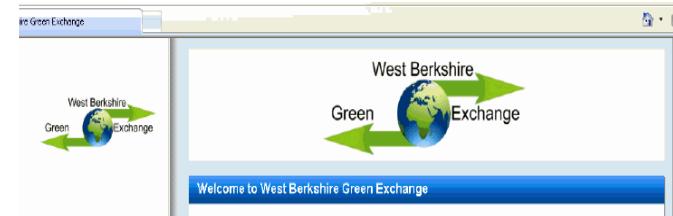

If you're thinking of setting up a sustainability/environmental group, a Greening Campaign, or have certain 'green' targets in your Parish Plan, then the Green Exchange is your one-stop repository! With such a diverse mix of people, with differing skills, someone's bound to answer your pressing questions.

The Exchange meets at least 4 times a year, including an annual conference and AGM. The meetings provide a chance for groups to network, listen to stimulating presentations and allows a communication channel between community groups and statutory agencies. A number of interim workshops and site visits occur too.

We have a website that is regularly updated with information from local groups and news on grants, current and forthcoming environmental legislation and other useful tools to help you achieve your goals.
